Project Design
Phase-I Solution
Architecture

Date	19 September 2022
Team ID	PNT2022TMID17277
Project Name	Project - Gas leakage monitoring and Alerting system
Maximum Marks	4 Marks

Solution Architecture:

- This system is based on IoT and deep sensing.
- If any gas leakage occurs ,immediately it is sensed by the gas sensor.
- And it is displayed in the LCD also .
- It can be sensed from any where ,because the data is stored in the IoT cloud.
- Also in our system the sensor will also replace the gas which is needed.
